What is ToolScout?

ToolScout is an AI-powered research pipeline built for Composio's integration team. It automatically researches 100 apps across API authentication methods, self-serve access, API surface breadth, MCP server availability, and buildability — producing structured JSON optimized for Composio's agent toolkit pipeline.

3-Tier Research Architecture

TIER 1	TIER 2	TIER 3
Composio Native	Web Search	Deep Verify
Checks Composio's live integration catalog. Instant high-confidence result.	Claude claude-sonnet-4-6 + web_search_20250305 researches API docs, auth, pricing, MCP.	Re-runs on low/medium confidence with verification prompt to catch errors.

Key Findings — Top 20 Apps by Opportunity Score

App	Category	Auth	Buildability	Score	MCP
Aircall	Communications and Messaging	OAuth2	ready	4	—
Airtable	Productivity and Project Man	OAuth2	ready	4	—
Amazon Selling Partner	Ecommerce	OAuth2	ready	4	—

App	Category	Auth	Buildability	Score	MCP
Apify	Data SEO and Scraping	OAuth2	ready	4	—
Asana	Productivity and Project Man	OAuth2	ready	4	—
Attio	CRM and Sales	OAuth2	ready	4	—
BigCommerce	Ecommerce	OAuth2	ready	4	—
Binance	Finance and Fintech	API Key	ready	4	—
Brex	Finance and Fintech	OAuth2	ready	4	—
Bright Data	Data SEO and Scraping	OAuth2	ready	4	—
Clay	Data SEO and Scraping	API Key	ready	4	—
ClickUp	Productivity and Project Man	OAuth2	ready	4	—
Close	CRM and Sales	OAuth2	ready	4	—
Cloudflare	Developer Infra and Data	OAuth2	ready	4	—
Copper	CRM and Sales	OAuth2	ready	4	—
DataForSEO	Data SEO and Scraping	Basic Auth	ready	4	—
Datadog	Developer Infra and Data	OAuth2	ready	4	—
Devin	AI Research and Media	OAuth2	ready	4	—
Discord	Communications and Messaging	OAuth2	ready	4	—
Firecrawl	Data SEO and Scraping	OAuth2	ready	4	—

Apps by Category

Category	Count	Ready
Data SEO and Scraping	10	8
Communications and Messaging	10	10
Productivity and Project Management	10	10
Ecommerce	10	9
CRM and Sales	10	9
Finance and Fintech	10	7
Developer Infra and Data	10	10
AI Research and Media	10	4
Support and Helpdesk	10	9
Marketing Ads Email and Social	10	10

Verification Accuracy

Pass 1 (confidence-weighted estimate): 87.6% — Agent rates its own confidence (high=90%, medium=70%, low=50%) across all 100 apps. 90 apps returned high confidence, 8 medium, 2 low.

Pass 2 (re-research sample): Skipped in this run due to API quota exhaustion. Would re-research 20 apps (biased toward low/medium confidence) and compare key fields.

Pass 3 (human review): 10 apps flagged for manual verification — iPayX and Paygent Connect (low confidence), Ahrefs, Grain, DealCloud, Gladly (needs_outreach), Fathom, Otter AI, NotebookLM (not_buildable).

Honest Limitations

- **32 apps manually filled** — API quota ran out mid-run. Stubs are based on public documentation and marked source='manual'.
 - **Gated enterprise APIs** — PitchBook, DealCloud, Gladly, and Grain require sales contact for API access. Accurately flagged as needs_outreach.
 - **No-API apps** — Sherlock, Mermaid CLI, Fathom, and Otter AI have no public REST API. Correctly marked as not_buildable or non_standard.
 - **MCP coverage** — Searches smithery.ai, npm, and GitHub. Private/unpublished MCP servers won't appear. mcp_exists=False means not found publicly.
-

Tech Stack

Agent: Claude claude-sonnet-4-6 via Anthropic Python SDK

Web Search: web_search_20250305 (Anthropic native server-side tool)

Tier 1: composio-anthropic SDK — live integration catalog check

Schema: Pydantic v2 — structured output validation

Caching: Prompt caching via cache_control ephemeral on system prompt

Resume: Per-app JSON cache in data/raw/ — safe to interrupt & resume

Report: Standalone index.html — vanilla JS/CSS, inline SVG charts

Live Demo: Streamlit app — real-time research for any app
